## nLITE® Hybrid Brush made of boar bristles for extremely powerful cleaning performance

The brush is highly recommended for maintenance cleaning and for the cleaning of PV/solar modules. Easier glide and less weight than full natural hair brushes

### BOAR BRISTLES

- Outside boar bristles - high cleaning power of the folded bristles, no streaks
- Inside bristles with Power Bristle Technology - very high scrubbing power, easy glide, low water absorption

### SWIVEL LOCK

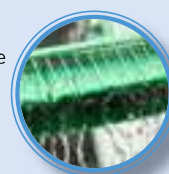

You've never cleaned faster and more precisely down to the last corner: the swivel function is a completely new way of cleaning with pure water up to the first floor (6 m). Open the SwivelLock and experience the advantages:

- The brush socket, which can be swivelled freely through 180°, enables the surface to be cleaned with an S movement with the brush touching down over the entire surface
- Enlarges the work area, ideal for cleaning from boom lifts or gondolas

### RINSE BAR

This special flushing nozzle bar is attached above the brush and delivers the right amount of pure water exactly where it is needed for powerful rinsing of the cleaned surface - more effective than ever before!

## nLITE® Angle Brushes for large surfaces, frames and corners

### SPECIAL BRISTLE CUT

Allows even easier cleaning of corners with 90° angles. The short, stiff bristles inside the brush provide great scrubbing power.

### HIGH BRISTLE DENSITY

Guarantees excellent cleaning with little bending as well as long durability.

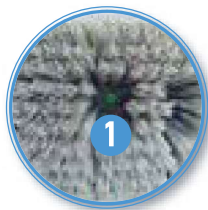

The brush can also be used with hot water.

### THREE WAYS OF WATER SUPPLY

High flexibility due to three ways of water supply and therefore extremely easy removal of dirt.

- 1 Powerful cleaning by means of a water jet from the centrally integrated nozzle block.
- 2 3 The RinseBar can be used in two different positions: This means that window sills and roller shutter boxes can also be cleaned optimally.

## nLITE® Soft Brush for a gentle surface cleaning

### nLITE® SOFT BRUSH

Reduces risk of damage to sensitive surfaces.

- Thin bristles with high flexibility
- Short bristles in high density for stable fibre layout
